

Mr. Roger A Hickman
"Heath Cross"
Cheddleton Heath Road,

21st September 2017.

F.A.O. Mr. M. Ellerenshaw.

Dear Sir,

With reference to the planning application
RE SMD/2017/0494.

Kindly note the following objections.

The application is for building on a greenfield/agricultural land site, and has not had building on it before, used mainly for horse grazing, and is well back from the building line, and would require a cul de sac to be constructed leading on to Cheddleton Heath road, a narrow D class road, with difficult passing areas, the field leads on to other grazing areas, and would significantly alter the appearance of the area, and totally alter its character, a new building line would be required, set further back into a greenfield site, this would set a new precedent.

To the best of my knowledge, information and belief, the land subject to the application is likely to be contaminated, in that asbestos has been buried on the ~~the~~ land.

Your consideration for my objections would be appreciated.

Yours faithfully,

MR. ROGER A HICKMAN.
