Good afternoon,

In reference to the above planning application.

We strongly object to the proposed works for the folowing reasons:

The proposed works will enable a much larger number of people to congregate on the field. The large number of people whom already attend create issues as the car park is nowhere near big enough. People already park on the grass which is not in keeping with the green belt area it inhabits and is an eyesore when looking out of our windows.

The clubhouse already acts as a makeshift pub most nights with a large number of people gathering on the field, the new shower building will allow them a larger capacity drinking area which I believe is the real goal of the works. Which could later go on to allow them a change of use request to more of a party/wedding venue.

There are already noise issues and this will only increase with the larger number of people catered for.

I would also like to point out that works have already begun even before the dedline for the application has passed.

Please take the above matters into consideration when discussing the applciation.

Kind regards.
