ST 87AX

Submission: Objection

Comments: Dear Members of the Planning Committee,

This revised plan does not address the problem of its effect on our property. The original plan has been changed in the length of the extension. The original and revised plan -affects the light in our kitchen/diner because of its height and not its length. Our property (6 Harlech Drive) is lower than no. 8 by at least two feet and so the height of the proposed extension would cut off the light to our kitchen/diner to a worrying degree. The plan which you see does not give you any idea of how much our house will be affected. That is our main concern but there are others eg. our patio seating area will be deprived of sunshine. We would welcome you to visit our house on order to fully appreciate the overbearing effect of this revised plan. Please note that our house is the only property affected by this plan and we have enjoyed the uninterrupted source of light for forty one (41) years. Thank you, Noreen and Jim Baker.
