

Figured dimensions should be taken in preference to scaling and any errors or omissions reported to the architect at once

This architectural drawing shows the front elevation of a modern house. The main structure features a steep gabled roof and a light-colored facade. On the left side, there is a tall, narrow window unit. The central part of the facade has two rectangular windows, one above the other. To the right, a smaller section of the house with a lower roofline is visible, featuring a large glass door and a small porch area. The entire drawing is rendered in black lines on a white background, with a solid grey base representing the ground.

A schematic diagram of a building facade. It features a large rectangular window on the left and a smaller rectangular window on the right. Both windows are equipped with horizontal blinds. The building is represented by simple black outlines. At the bottom of the image, there is a solid dark gray horizontal bar.
