Project	Churnet View Road, Oakamoor		-
Contract Manager	Steve Robinson	Date	-09/07/18

CONTROL OF POLLUTION
<p><u>MUD / DIRT</u></p> <p>Any mud arising from site activities will be cleaned as required. Any excess mud will be cleared utilising a Road Cleaner / Specialist. Wheel wash facilities are to be used for vehicles(see plan)</p> <p><u>DUST</u></p> <p>Dust arising from general building works will be kept to confines of the building by keeping closed windows and damping down where necessary. When operatives use power tools, up to date equipment with automatic dust collection bags will be utilized. Any operatives using dust masks will need to be face fit tested. Dust masks (FFP3 minimum) will be worn together with goggles when operatives are carrying out works of a dusty nature. The site is to be kept clean during the progress of the works.</p> <p><u>MATERIALS</u></p> <p>All materials arising from construction will be removed by the shortest possible route to a skip, as soon as possible.</p> <p>Skips will be removed from site and taken to licensed tips by approved licensed contractors only.</p> <p><u>NOISE</u></p> <p>Works of a particular noisy nature will be assessed by the Site Manager. When noise exceeds the lower exposure level of 80db the Site Manager has to provide information and training and make hearing protection available. When noise exceeds the upper exposure level of 85db, the contractor is required to take reasonably practicable measures to reduce noise exposure, such as engineering controls or other technical measures. The use of hearing protection is also mandatory if the noise cannot be controlled by these measures, or while these measures are being planned or carried out.</p> <p>Finally there is an exposure limit value of 87 dB, above which no worker can be exposed (taking hearing protection into account).</p>
