Description

Description

There are various bat species that can use this bat box, this depends on the species that occur locally and where the bat box is hung.

The attractive design is suitable for crevice roosting bats and has a rough interior to provide lots of grip. Bats need to increase their body temperature before flight so prefer warm roosting spots, which is why many of our bat boxes have a black exterior to absorb heat from the sun. Woodstone® isn't just strong, it also has good thermal insulation, reducing temperature fluctuations inside the box and helping to make this an ideal roost site.

Siting

The bat box can be placed on both a tree or a façade. Preferably choose a sunny spot but do not place the cabinet under or in artificial light, and avoid placing where the rain can directly access the box.

Maintenance

The bat boxes must be cleaned once a year in winter, but first check whether the boxes are not occupied. With a special brush with a long handle, all cobwebs and other dirt (such as faeces) can be removed. The suitability of the nest box and the suspension must also be checked annually.

Specifications

Stock code	91472
Dimensions (b x h x d) (cm)	22 x 50 x 6
Inner Dimensions (b x h x d) (cm)	18.5 x 46 x 2.5
Weight (kg)	3.5
Colour	Grey
Material	Woodstone® / Plywood
Wildlife (species)	Parti-coloured bat
Wildlife (general)	Bats
