Comments: I am the veterinary surgeon providing health and welfare advice to CR Down Farming. CR Down supply high health pigs to Mr Gibson. The proposed application is to upgrade finishing pig accommodation which will provide an improved standard of welfare. The proposed building will not require large volumes of straw, reducing the amount of manure produced and enabling a more efficient method of waste management. Mr Gibson currently runs the unit to a high standard of stockmanship and welfare, the proposed upgrading to the buildings is a necessary part of ensuring the best production practices, health, welfare and productivity of the pigs.
