Submission: Neither
Comments: The issues on the above application is the highway speed. The highways office report states clearly about the visibility exiting grove court. The visibility is better now that the wall has been lowered and the top of the posts removed, but as per the comments we feel that the speed of the highway should be reduced due to the visibility not been great pulling out of grove court.

There is a lot of school children that walk down that section everyday. This is a disaster waiting to happen.
