Our property is less than 9 Feet away from the side elevation of Mount Pleasant. As per the proposed plan, rendering is to be removed from that side of the property and the back of the property, and it is to be faced with stone and there will be an extension. We need to ensure that there will be proper safety precautions taken to safeguard our property and our garden from the substantion dust caused by the removal of the rendering which contains cement dust and is detrimental to health. Also, we have only recently had our own masonary work painted cream and do not want this spoiled. Our bathroom, downstairs toilet and the back door all face the side elevation of the proposed alterations and therefore, there needs to be sufficient screening to ensure we are not overlooked by workmen using scaffolding.
