Dear Sir/Madam:

Re: Planning application DET/2020/0004

I regularly drive along Beat lane as my children are at school in Congleton. I am extremely concerned that the proposed farm road will create an unacceptably high danger for road users at the junction where the track meets Beat Lane. It will obviously facilitate a far greater quantity of farm traffic using the junction.

The road at this point is very narrow and there are often problems with vehicles passing at speed! As an ambulance technician I am fully aware of the potential additional danger to cars, cyclists, horse riders and pedestrians near the junction. I am also aware of the amount of road traffic collisions on this part of the road, some ending in fatalities.

Surely there is a more sensible and safer route available. The access points used by the farm already should be used instead.

Sincerely,

Helen Emmett
