> We wish to object categorically to the above planning application. Our property (32 Grove Street) has a very small rear yard and the proposed 2nd storey extension of over 20ft high would be just a few feet from our boundary. Therefore this would cause an emmense and unacceptable loss of light.
> Many properties would have their privacy compromises because of the overlooking Windows.
> With these points in mind, when you come to make your final decision we ask that you consider the Grove Street residents who would suffer from the impact of such a large construction in such close proximity.
> We are aware that these plans were turned down previously and we urge you most strongly to refuse this application once more.
