Hi Jane,

Environmental Health agrees that this is a Schedule 2 development but considers the 2016 Environmental Statement provided with the outline application, SMD/2016/0378 is adequate to assess the significant effects of the above additional developments on the environment. In addition, an updated AQ assessment was submitted in response to the declared AQMA at the Cellarhead junction.

It is considered therefore that the environmental impact, with respect to areas within Environmental Health remit, can be controlled thorough the appropriately recommended conditions and an EIA is not necessary.

All the Best

Dan

Hello Dan,

We have already commented and recommended conditions on these 2 apps which I would say would indicate we believe the applications can be conditioned and do not require an EIA under our areas of concern. Unless I am missing something of course!!

What do you think?

Thanks

Den,
