16.10.20

Discharge of condition 7 SMD/2019/0722

We can confirm that works on site were carried out in strict accordance with Sladens remedial strategy dated 15.04.20. Furthermore we can also confirm that no further concerns were found in any area of the site when excavations commenced.

Per Sladens verification plan we have included the following:

1. Topsoils for site sensitive area was procured from Tarmac Green Tree Eaton Hall site, 38 tonnes of this material were delivered on 17.9.20 and placed in the rear gardens and sensitive areas within the site. Testing documents from the source and delivery notes to this effect are included.
2. Site won material was stockpiled on site and has been placed in road areas to be capped in a bound material (tarmac)
3. Also attached with this letter is Sladens Verification letter report dated 15.10.20, which includes photographs of the clean topsoil placed as described above also the trial holes and confirmation that the testing returned satisfactory results.
