

TREE SURVEY PLAN

General Notes

THINGS TO BE CONSIDERED FOR REMOVAL

Category 'U' Trees to such a condition that any standing value would be lost within 10 years and which should, in the current context, be removed for reasons of safety or aesthetic considerations.

THINGS TO BE CONSIDERED FOR RETENTION

Category 'A' Trees that have a medium, immediately apparent value, such that their removal would be a significant loss to the landscape. These trees are of medium size, are in good health, and are of a species that is not native to the area. Their removal would be a significant loss to the landscape.

Category 'B' Trees that are of medium size, are in good health, and are of a species that is not native to the area. Their removal would be a significant loss to the landscape.

Category 'C' Trees that are of medium size, are in good health, and are of a species that is not native to the area. Their removal would be a significant loss to the landscape.

Category 'D' Trees that are of medium size, are in good health, and are of a species that is not native to the area. Their removal would be a significant loss to the landscape.

Category 'E' Trees that are of medium size, are in good health, and are of a species that is not native to the area. Their removal would be a significant loss to the landscape.

Category 'F' Trees that are of medium size, are in good health, and are of a species that is not native to the area. Their removal would be a significant loss to the landscape.

Category 'G' Trees that are of medium size, are in good health, and are of a species that is not native to the area. Their removal would be a significant loss to the landscape.

Category 'H' Trees that are of medium size, are in good health, and are of a species that is not native to the area. Their removal would be a significant loss to the landscape.

Category 'I' Trees that are of medium size, are in good health, and are of a species that is not native to the area. Their removal would be a significant loss to the landscape.

Category 'J' Trees that are of medium size, are in good health, and are of a species that is not native to the area. Their removal would be a significant loss to the landscape.

Category 'K' Trees that are of medium size, are in good health, and are of a species that is not native to the area. Their removal would be a significant loss to the landscape.

Category 'L' Trees that are of medium size, are in good health, and are of a species that is not native to the area. Their removal would be a significant loss to the landscape.

Category 'M' Trees that are of medium size, are in good health, and are of a species that is not native to the area. Their removal would be a significant loss to the landscape.

Category 'N' Trees that are of medium size, are in good health, and are of a species that is not native to the area. Their removal would be a significant loss to the landscape.

Category 'O' Trees that are of medium size, are in good health, and are of a species that is not native to the area. Their removal would be a significant loss to the landscape.

Category 'P' Trees that are of medium size, are in good health, and are of a species that is not native to the area. Their removal would be a significant loss to the landscape.

Category 'Q' Trees that are of medium size, are in good health, and are of a species that is not native to the area. Their removal would be a significant loss to the landscape.

Category 'R' Trees that are of medium size, are in good health, and are of a species that is not native to the area. Their removal would be a significant loss to the landscape.

Category 'S' Trees that are of medium size, are in good health, and are of a species that is not native to the area. Their removal would be a significant loss to the landscape.

Category 'T' Trees that are of medium size, are in good health, and are of a species that is not native to the area. Their removal would be a significant loss to the landscape.

Category 'U' Trees that are of medium size, are in good health, and are of a species that is not native to the area. Their removal would be a significant loss to the landscape.

Category 'V' Trees that are of medium size, are in good health, and are of a species that is not native to the area. Their removal would be a significant loss to the landscape.

Category 'W' Trees that are of medium size, are in good health, and are of a species that is not native to the area. Their removal would be a significant loss to the landscape.

Category 'X' Trees that are of medium size, are in good health, and are of a species that is not native to the area. Their removal would be a significant loss to the landscape.

Category 'Y' Trees that are of medium size, are in good health, and are of a species that is not native to the area. Their removal would be a significant loss to the landscape.

Category 'Z' Trees that are of medium size, are in good health, and are of a species that is not native to the area. Their removal would be a significant loss to the landscape.
