Submission: Objection

Comments: I wish to register my objection to the above planning application.

The proposed communication monopole if accepted as being a much needed facility for the village should be situated on a site which does not intrude on the area in such an adverse way. The height of the structure at 18 metres, with its wraparound cabinet at its base and associated ancillary works will have an adverse visual affect and is not in keeping to a country village with low-rise buildings, open countryside and trees.

Alton is a tourist area, known for its picturesque environment and has had conservation status for a great many years. The structure on the site proposed will be an unwelcome addition to our street scene and detract from the visual impact to both residents and visitors.

It will also adversely affect those residents living in close proximity, many of which will be in full view of the structure, it may too have an impact on the financial value of their properties. I understand the Alton Parish Council had planned to introduce wild flowers to the area and site in question...how much more appropriate if it could continue in its project!!

I therefore appeal to the planning committee, to follow the guidelines of the National Planning Policy Framework in respect of using high quality communications infrastructure regarding design and height and consult and negotiate with all those concerned in the provision of this added facility, particularly the residents of the village to ensure a more appropriate and suitable site is found for its installation,.
