Subject: SMD/2021/0316 Mr R Shenton

To whom it may concern,

I am writing in response to the letter dated 21/05/2021.

I am attached to this property and I am apposing this application for the building works to be carried out....

1. The back extension has already been completed with no planning permission or notice this work was going ahead. I would like to know how an extension has been able to be built without permission as we had an extension a lot smaller than the one next door and we had to jump through hoops to get this passed as we needed it to adapt as my husband is disabled. I have been told that help can be given from yourselves in regards to helping a disabled person adapt a home for washing and changing needs.
Work was then started with no notice from next door and my property was affected severely as workmen and vehicles were parked right outside my house blocking access for myself and my husband who gets around on a mobility scooter!!!!
2. My fence was damaged in the building of their back extension in which I had to wait 3 weeks for this to be sorted and I have 2 large dogs which I have made sure that my back garden is completely secure for my dogs, they come along and think its highly amusing to bully and intimidate.
3. My mains water tap is directly under where they are planning to erect the side extension, as stated before my husband is disabled and incontinent therefore the upheaval of all this would effect myself and my husband.
4. Any front extensions would directly effect us as this would be onlooking in my living room. This can not happen as it is invasion of privacy.
5. The applicant has also taken away pavement outside his house with no permission which has effected my boundary as the fence he has messed with is slowly collapsing and my front garden borders which may I had have been there for 7 years are slowly disappearing.

The fact that work has already been completed and im only now getting a letter in regards to building work is an absolute joke; how can work be completed before any application has been applied for??

My husband is disabled and we had a really hard job getting permission to build a wet room on a lot smaller scale and to add insult we had to pay fees to get this passed.

Then work to his driveway starts and he removes pavement without permission or notice.

The amount of noise that this applicant makes is unbelievable selfish towards others. So I am apposing this application for these reasons.
