Submission: Objection

Comments: I strongly object to the proposal of the erection of the communications mast that is opposite my property! This mast will not only be an eye sore to the entrance to a historical village and in front of a beautiful oak tree but it imposes upon our privacy and will be visible not only from the front elevation of my property but also in the rear garden! Whilst I don't object to communications being improved within the village, there would be many other locations that would be much more suitable than within a residential area that will tower over many adjacent properties and I as far as I understand this location has only been selected as it has an existing power source but the proposal has neglected any thought of local residents.
