SMD/2021/0124

I have received a letter informing us of a planning application that has been put in, we have rang the number and they have said to email you as to why we don't want this to go forward. He has already had the bigger part of our side garden and left us with hardly anything and he's turned that into a tip, see for yourselves. We have nieces and nephews that play in that garden because there's no room on the other one, not to mention we already a lack of privacy already with his other buildings, if he were to have more built then it would be facing directly at our house and into bedrooms. A few months ago We have had him look and come onto our garden without our permission and has been trespassing onto other gardens to do so. We caught him on cctv and rang the police about it. We have put a lot of time and dedication on our garden and hearing about it being going to waste has caused so much Anxiety and stress. A lot of us in the house suffer from anxiety and depression. Please consider what we say.
