Submission: Objection

Comments: This proposal is immediately opposite the frontage of my home and within 150 yards from my entrance drive.

My objections and concerns are:

1. The site is on rising land in full view from my home and could not easily be screened
2. Sustained inverter noise and domestic electrical interference.
3. Construction traffic noise and extreme danger over already very dangerous narrow roads with blind bends immediately next to the proposed site location.
4. Accommodation of an alternative additional planned agenda by the present landowner to conveniently feed power into the same facility from a very large previously planned solar panel farm on a very large acreage of adjacent farm land under the same present ownership which would dominate and scar what is a presently a quiet rural hamlet in a green belt area designated already to be of outstanding beauty!
