Dear Ailsa

Re: Planning application SMD/2021/0139 – Retrospective application for stables, Rownall View

I **object** to the above retrospective planning application on the basis that a permanent structure on this land for stables contravenes the NPPF.

There are a large number of horse owners in the local area of Staffs Moorlands where people keep their horses in a field and they have only used temporary field shelters on skids to comply with planning law. If this application is approved it is surely setting a precedent to all other horse owners to build permanent structures without planning, then apply retrospectively?

Yours sincerely,
