Subject: FW: External Consultation Letter - App ref SMD/2021/0352

Hi Jane,

In any planning application we would like to see details of:

Duration of construction works;
Intensity of construction works – vehicles per day....;
Types and sizes of delivery vehicles;
Numbers of delivery vehicles;
Approach routes for deliveries;
Consideration of the effect of large delivery vehicles on relatively narrow lanes and proposals to safeguard or repair damage to carriageway, edge and verge;
Proposals for access – widening, hard surfacing, visibility splay;
Details of visits required for ongoing operations and maintenance;

Can access not be gained through the existing Cellarhead substation. This would be a preferable route. This would reduce the length of narrow lanes and tighter corners needed to be negotiated by delivery vehicles – and potential damage to the highway. Location plan doesn't show much context, but mapping shows substation to be close to the site and similar distance through the separating field as from the currently proposed access. What other land holdings does the landowner have that could ease access to the site?

Trust this is of use.

Regards,

Dave
