90 coleridge Drive Cheadle
Planning for alterations to existing boundary wall

I think if you let this Planning go through someone is going to get killed because the cars come around that corner very fast there are a lot of disabled people around here and cannot get past with the cars parked on the footpaths as it is now as Mrs avery has loads of cars parked at the side of her house and doesn't realise that they are inconvenience everyone else but she said so what they don't matter seems like Mrs avery will trample over everyone else to get what she wants and bugger the consequences and anyone else getting hurt nobody would be able to see properly to get out of there Drive way's who actually live in coleridge Drive and not on glebe road Mrs averys front door is on glebe Road not coleridge Drive but she still think she can just park all her relatives cars anywhere don't care for anyone else the disabled people have problems getting past all her relatives cars now parked on the footpaths so give her a bit more space and there will be havoc but you probably won't listen to this but when someone gets killed it will be a case of I told you so that is everyone's opinion in coleridge Drive
Not just me
At 55 no 59 no 88 coleridge Drive all think the same
