

Recent application for air source heat pump 21 School Close

[SMD/2021/0440]

Hi,

Hope you are well. We have recently had a conversation with our neighbours at 21 School Close, Dilhorne, ST10 2QB regarding installing of an air source heat pump. They have discussed the expected noise this will create with us and the suggested concerns raised. We are happy with its installation and have no concerns regarding noise levels. We hope this email helps to support their application.

Many thanks, Jessica Boulton
