Afternoon

In regards to the amended planning application SMD/2021/0456 concerning the acoustic fence around The Gables, Donkey Lane and omitting the footpath to the rear of the property.

We agreed to the acoustic fence and omitting the footpath because the road is too close to the rear of my property and therefore not enough room for the footpath and planting causing, noise, pollution and lack of privacy.

On drawing number ARCH/PL/PH1 Rev Z10 the footpath is still shown although the application is to remove it. Also the drawing shows a peach colour chevron indicating tree/hedge removal which was not priorly agreed to. Also I would like a condition added that I be present to agree the siting of the new fence, so that the hedges are not damaged.

The original drawing, number ARCH/PL/PH1 Rev Z shows planting around The Gables. I feel this should remain as it will give us more privacy and protection against pollution and noise. Also there were hedges planted alongside Donkey Lane to the rear of plots 1-5 which is no longer on the revised drawing, I feel that this should remain as a lot of hedgerows have been destroyed and the wildlife of the area require more planting.

Please do not hesitate to contact me.

Regards
Steven Thornton
