Good Afternoon Jane,

Thank you for reconsulting us on application SMD/2021/0441 (Compton Mill).

In response to the comments provided by Hayley from 01/09/21 (in the email below):

- Section 9.1.4 of the Geo-Environmental Report provided states that 'Infiltration testing was carried out on site by a third party'. Please can this 3rd party assessment be provided as evidence that infiltration is unsuitable on site.
- Regarding the additional information, we have reviewed all the application documentation provided on the planning portal and hence our comments remain the same. I have attached these comments for reference.

Kind Regards
Roberta

Hi

Please can you pass this response from the Agent to the Case Officer?

Thanks

Jane

Hi Jane

Thanks for sending this through. I will pass it on to the Applicant team and ask for their assistance. In the meantime please note that the

Stage 2 Geo-Environmental Report (May 2021) does form part of the application documentation already. The LLFA can access it on the Council's application web-page.

In addition the submitted Flood Risk Assessment and Drainage Strategy appears to contain much of the information being requested (from a brief re-review it include micro-drainage calculations, levels information, draft maintenance and management plans and the County Council's proforma). Have the LLFA found these documents on-line?

I will come back with a robust response in due course.

Thanks

Hayley
