

weberpral M colour charts

weberpral M is available in a range of 24 monocouche colours — from our ever-popular colours such as Chalk, Silver Pearl, Ivory and Cream, to our more colourful choices such as Azure Blue, Earth Red, Sage Green and Rose.

It is very important to note that these representations of monocouche render colours are as website resolution permits. For this reason, we strongly recommend an actual sample is obtained. Final colour selection must be made against an actual sample, as opposed to an online coloured render colour chart.
