Submission: Objection

Comments: SMD/2021/0628- application by AP Proteins for a food processing unit, additional to the rendering factory.

I strongly object to the application. We are still encountering the obnoxious smells from the current factory. The management don't seem able to use the air filtration system correctly. I have phoned the factory complaining on numerous occasions. We had a week of almost constant smells recently in Folly Lane, as the wind was in an

easterly direction. Someone will always be affected by the odour as it's carried on the wind.

This food processing unit will be closer to residential properties and more noise will be apparent from machinery and transport. Traffic to the site will be heavier, in fact double.

The land is green belt and under no circumstances should this application be passed.
