Good afternoon,

I read about the possible development of a green belt on Froghall road,
I am completely disagree with this application because the number of residential buildings is already getting over used to the infrastructure of the town a lot, and I also consider the destruction of the green belt as sabotage!
Instead of new houses, make a green park there! plant trees, benches for the townspeople! playground!!! in this part of the town there is practically nothing for children! we also have a problem with roads as example: from Cheadle to Kingsley Holt people have to walk on a narrow and winding road !!!!! There is no sidewalk , where almost no one observes the speed limit !!!!! I already wrote about this to the road administration, to which they replied that everything is in order there. Coming back to the development plan - last weekend I traveled a lot around Stoke-on-Trent and noticed how many abandoned buildings throughout the city, there are whole streets !!!! why not demolish them and build up beautiful houses? why increase Cheadle? this town is beautiful as it is and construction of residential buildings is already underway! I think that will be enough for the next 20 years of this town. I hope for common sense and the right decision, thanks for listening to me, resident of 172 Froghall Road. ST102DN
Mr. Andzhey Buzhynski
THANK YOU.
