

First Floor Extension

Once the extension is built, it will reduce the daylight through my window at the side of my house. This is the main source of light to the landing and stairs so it will make it a lot darker for me when I am going up and down the stairs. The front of this extension will be 40 degrees from mid-point of this window (right to light) and it will also block the view I have of the street and all I will be staring at is a brick wall.

Looking at the plans there will be a window at the back of the store room. Could you please confirm if the glass is going to be opal, frosted or clear? If the window is clear it will mean my back garden will be overlooked and my privacy will be reduced.

I would really appreciate it if you could let me know if you decide this application is going ahead.

I await your response in the matter

Yours faithfully

P J Buckley (Mrs)
