Submission: Objection

Comments: The nation at present is being made very aware of climate change and the necessity of preserving our green spaces and trees so why even consider a development like this. It is in an area of outstanding NATURAL beauty, the site backs on to the ancient woodland of Dimmingsdale which has triple SSSI status, allowing this development to go ahead would surely damage that status and detract considerably from the views enjoyed by the many walkers who visit the woodland and also would drive the wildlife further away. The site itself has been stripped of any natural habitats and allowing this development to go ahead would only increase the range of that destruction. Our land adjoins the proposed site, we have made several areas into a refuge for wildlife where they can live undisturbed, thrive and be safe and this proposed development would destroy that

Tourism is important to the area but there is more than enough holiday accommodation, camping and caravan sites without granting this one in such an unsuitable place. There are no shops, places of entertainment nearby and therefore a car journey is necessary adding more pollution into the atmosphere. I object strongly to this proposed development and hope that the state of our planet is an important consideration in the decision.
