Submission: Objection

Comments: With an increase in the capabilities of the factory the increase in traffic through our village would be unacceptable and a detriment to the local residents. The road noise and pollution from the vehicles is bad for the environment and residents, especially those with chronic respiratory illnesses. We have lived in Wetley Rocks for 14 years and the noise and smell from the lorries coming through has increased already to intolerable levels. I have a chronically ill child who is woken regularly with the noise from the vibration of the lorries and the solution from the environmental health is to install triple glazing! Not affordable for us to do! The smell is getting worse to the point it has made my child physically sick on occasions as the smell lingers as the lorries pass through. The road through our village, although an A road, is narrow in places with narrow pavements that when the lorries come through, often faster than they should, you take your life in your own hands as a pedestrian and those of us that pull out of our drives on the blind bend risk being hit by the lorries as they hurtle round the blind bend. We understand that an expansion would mean bringing extra jobs and income to the local area but that needs to be balanced with the welfare of the local people and preserving our environment.
