Submission: Objection

Comments: I object this absolute scam of an application for 'remodeling of the golf course' it is clear as day this is a way for the proposer to line their pockets with no consideration for the impact this will have on whiston and the environment

I object this for the following reasons...

150,000 tons of 'engineering materials' this is an incredible amount of materials, who will police this? Who is going to check each wagon load to make sure it isn't contaminated? This will have a massive impact on wildlife, the natural water course and the local appearance. Importing this amount of materials not only affects the area it is been proposed to be used on but the local area itself. The highways and roads are not designed to carry that much extra traffic, where do the wagons wait if they are queuing to get on site the noise pollution will be unbearable. Turning the golf course into and landfill is unimaginable and the thought of the damage this will cause. The golf course does not need 150,000 tons are rubbish dumped on it! It needs to be regularly maintained and a new drainage system installing that is it. We are supposed to be protecting our local area and environment not turning it into landfill. We are all for sustainable living and doing our bit for global warming. This can not go ahead!
