5. Description of the Proposal

Please note in regard to:

- Fire Statements - From 1 August 2021, planning applications for buildings of over 18 metres (or 7 stories) tall containing more than one dwelling will require a 'Fire Statement' for the application to be considered valid. There are some exemptions. View government planning guidance on fire statements or access the fire statement template and guidance.
- Permission In Principle - If you are applying for Technical Details Consent on a site that has been granted Permission In Principle, please include the relevant details in the description below.
- Public Service Infrastructure - From 1 August 2021, applications for certain public service infrastructure developments will be eligible for faster determination timeframes. See help for further details or view government planning guidance on determination periods.

Description

Please describe details of the proposed development or works including any change of use.

New Field Access and Track.
The field access is currently served by a narrow track from a field to the north easterly side of the application site. From an animal welfare point of view the

5. Description of the Proposal

existing access track is considered a dangerous crossing. The track crosses a water course at the head of a steep gorge. In the past cattle crossing from field to field, pushing their way through I have lost their footing and fallen into the gorge. A stressful experience for the animal with the retrieval only being possible by mechanical means.

The movement of animals between parcels of land the applicant owns and controls in some cases requires herding on the country roads. This procedure is undertaken with great care with at least two herdsman. On the occasion when an animal is required to be loaded, this would normally be undertaken within the field area with care being taken on access and exist arrangements.

The proposal is to form both a field access gateway formed to a width which would allow a tractor and trailer to enter and exit the field in a forward gear. Traffic management on access and exist arrangements being the same procedure for that of herding, with a herdsman slowing vehicles using Ankors Lane in the vicinity of the proposed access point to prevent road users travelling at speed coming across slower moving agricultural vehicles or animals being herded .
