Submission: Objection

Comments: I wish to express my concern about the proposed emissions from the new development, the planning states they will be managed in the same way as the current plant, as someone who lives near to Croda, there are occasions when my asthma is triggered by the emissions from the plant, at times when it is triggered there is a very distinctive odour which is not always there, I presume it depends on the process they are working on, but when it is it will often trigger an asthma attack. I assume emissions will be monitored, but unless they are allowed to make spot checks it is possible for the company to restrict what they do when they know they are being monitored to pass, as I know other companies in Leek do, if this issue can be addressed then I would support the plans, but if not oppose it as I am very concerned about my health and any one else who is affected, I don't want a Walley's quarry situation on my doorstep.
