Hi Ailsa,

Please find attached our response where we no longer require further investigative works or a verification report as a result of the information submitted.

Therefore, we withdraw the recommended planning conditions in our previous response, letter ref. UT/2021/119582/02-L01, dated 06 January 2022 and instead recommend an unsuspected contamination planning condition.

If you have any queries do not hesitate to contact me.

Many thanks,

Anne-Marie
