Email:

Submission: Neither

Comments: The buildings in this application are in direct line of sight from our property and within 200m of our property boundary and within 500m of our property house. we therefore disagree with the claim made with regard distances to neighbouring properties.

the buildings are uphill and north east from our property raising concerns with regard prevailing wind bringing noise and pollutants as well as ground run off bringing chemical pollutants to our property if no suitable provisions and or restrictions are in place and enforced).

we operate an organic ethos to our land and we do not wish to have toxins brought into our environment as we believe it will bring harm. to be clear by toxins we mean all types of environmental toxins (airborne, waterborne, sight, noise pollutants) from additional traffic as well as on site operations and we also have concerns of increased radiation exposure from increased use of electricity, wifi and other radiation producing activities.

there is also hearsay of it being used for badger culling which we hope is not true as there are local businesses already established dealing with animal processing and this type of operation belongs in an industrial area not in an area of farmland.

please also note we did not receive proper notice of this application else we would have submitted our response sooner. we only got news of it today.

given the above we wish the application be refused and the land remain as agricultural use
