4. Description of Proposed Works

Please describe the proposed works:

The property is a Grade 2 listed building. The property has a pair of double gates that allow entry onto the main road. These are an important security and safety feature as there are pets and young children in the house and the adjoining road is very busy with a 40mph speed limit. The current gates are of wooden construction and are fixed into the ground- there is no physical connection with the listed property. They are now in very poor condition and need to be replaced- for cosmetic and functional reasons. I originally identified a design of gate manufactured in metal, very similar in profile and colour to the existing gates.The application was rejected as metal was not considered in keeping with the historical aspect of the building. Therefore I have resubmitted the application with a purely wooden design. The size and profile of the gate is the same as the existing design. They will professionally manufactured and installed by a local carpenter.
