Comments: Re: SMD/2022/0014 Proposed construction of a revised surface water outfall associated with
Moneystone Park leisure development.

I wish to make you aware as a resident of Whiston of my concerns in respect of the safety issues around the lake in Quarry 3 and how the works needed to complete application SMD2022/0014 will effect the stability of the bunds retaining the water in the quarry.

As you will know there are serious concerns about the continually changing water levels particularly arising from the developers desire to squeeze in roads and as many lakeside lodges as possible around of Quarry 3. Abbeydale, working on behalf of the applicants have identified recent collapses particularly on the slopes of the northern face, with

a distinct possibility of a catastrophic failure of the northern bank supporting Whiston Eaves. Plus the current regime of raising the water level will further exacerbate the dangers to staff and visitors, from the deep waters retained in the quarry. In particular the potential of raised water levels adversely affect the narrow sandstone bund in the southwest corner of the quarry. This is of major concern to myself and other residents as there is a possibility of the bund collapsing due to the increased water level.

I object to the granting of this application on the grounds of ecological damage to the land below the new water outfall and an increased health and safety risk to human life from geological failures arising from the works.

Yours Sincerely Mrs Russell
