Subject: Brampton Mr John McNerney smd/2021/0847

Further to your notification of the above plans to extend and make alterations this property I should like to make my objections known.

The proposed alteration to this property involves second storey balconies which will be very close to my boundary. Presently the gable end facing my bungalow does not have any upper floor windows. The plans propose to have a large section of glass and balcony coming out almost to my boundary. This will severely impact any privacy I currently have to my lounge and dining room, and will tower over the patio area I have. It will also block all the light from my garden and windows. The property Brampton is elevated and it will not be possible or practical to screen to compensate for this or address the privacy issue. I feel that this will reduce the value of my bungalow and the plans should be amended to be more sympathetic to the surroundings. I have already agreed to several trees being removed to help accommodate these plans without knowing the impact if this development is approved. Would you please acknowledge receipt as I submitted an objection on the website and heard nothing back.

Yours Sincerely, Tracy McMullen
