| <b>PROPOSED DEVELOPMENT</b> | DET/2022/0007 Application to demolish Single Storey<br>Safeguarding modular unit |
| <b>PROPOSED DEVELOPMENT</b> | DET/2022/0008 Application to demolish 2No Single<br>Storey Barns                 |

**Potential Areas of Environmental Concern.**

1. Demolition Impacts (Condition)
2. Asbestos (Advisory)
3. Building Control (s. 80 Demolition Notice Required)

***General Comments***

- Asbestos: A Demolition or refurbishment asbestos survey and risk assessment should be carried out prior to the demolition/renovation of the existing buildings. The enforcing authority for this type of work is the Health and Safety Executive (HSE) and it is recommended that you contact them directly to discuss their requirements:  
<http://www.hse.gov.uk/>

**Recommendation and Conditions**

The Environmental Health Department have no objection subject to the following conditions being applied to any permission granted.

**1. Construction & Demolition Works: Time of operations**

Unless prior permission has been obtained in writing from the Local Planning Authority, all noisy activities shall be restricted to the following times of operations.

- 08:00 - 18:00 hours (Monday to Friday);
- 08:00 - 13:00 hours (Saturday)
- No working is permitted on Sundays or Bank Holidays.

In this instance a noisy activity is defined as any activity (for instance, but not restricted

to, building construction/demolition operations, refurbishing and landscaping) which generates noise that is audible at the site boundary.

**Reason:** To avoid the risk of disturbance to neighbouring dwellings from noise during unsocial hours.

## **2. Construction & Demolition: Construction Method Statement**

The development, including demolition hereby permitted shall take place until a Construction and Environmental Method Statement has been submitted to and approved in writing by the Local Planning Authority. The Construction Method statement should include the following details:-

- I. A scheme to minimise dust emissions arising from demolition/construction activities on the site. The scheme shall include details of all dust suppression measures and the methods to monitor emissions of dust arising from the development.
- II. Details of wheel washing facilities. All demolition/construction vehicles shall have their wheels cleaned before leaving the site;
- III. a scheme for recycling/disposal of waste resulting from the demolition/construction works;
- IV. the responsible person (e.g. site manager / office) who could be contacted in the event of complaint;
- V. Any waste material associated with the demolition or construction shall not be burnt on site but shall be kept securely for removal to prevent escape into the environment.

Once approved, all relevant activities on the site should be carried out in accordance with Construction and Environmental Method Statement throughout the course of the development. Any alteration to this Plan shall be approved in writing by the Local Planning Authority prior to commencement of the alteration.

**Reason:** *To protect the amenities of the area during construction*

### **Advisory Note/ Informative:**

Please be aware that the responsibility for safe development and secure occupancy of the site rests with the developer.

- A Demolition or refurbishment asbestos survey and risk assessment should be carried out prior to the demolition of the existing buildings. The enforcing authority for this type of work is the Health and Safety Executive (HSE) and it is recommended that you contact them directly to discuss their requirements: <http://www.hse.gov.uk/>
- Any approved noise scheme and measurements should pay due regard to the Professional Guidance on Planning and Noise (ProPG), British Standard BS8233: Sound insulation and noise reduction for buildings (Code of Practice), BS4142:2014 Methods for rating and assessing industrial or commercial sound and/or the Building Regulations 2010 Document E or other appropriate guidance
- Any approved foul drainage system should meet the British Standard 6297:2007+A1:2008: Code of practice for the design and installation of drainage fields for use in wastewater treatment <http://www.bsigroup.com>
- Advice on controlling flies and light can be found in: Statutory Nuisance from Insects and

Artificial Light (defra 2005) available as a free download  
<http://archive.defra.gov.uk/environment/quality/local/legislation/cnea/documents/statnuisance.pdf>

- During any demolition and construction activities (including landscaping) the contractor shall take all reasonable steps to prevent dust formation and prevent any dust formed from leaving the site boundary.
  - The control of dust and emissions from construction and demolition Best Practice Guidance, produced by the greater London councils
