With regards to the planning application smd/2021/0829. I have many issues with the application firstly you have put a slip road for the houses, what is going to stop cars which will be queuing using the slip road to jump the lights? And the same issue will be the safety of pedestrians and cars coming out of their driveways. Also the slip road looks a one way system which means we will have to wait for the lights to change. Also having queuing traffic sitting outside the house will increase the pollution, noise and that will not help the mental health of any of the residents within Draycott and Cresswell
