

DELEGATED DECISION REPORT

DET/2022/0013
Valid 14/02/2022

**PARK HOUSE ASHBOURNE
ROAD
BOTTOMHOUSE
LEEK**

**APPLICATION TO DETERMINE
IF PRIOR APPROVAL IS
REQUIRED FOR A PROPOSED
ERECTION OF
AGRICULTURAL BUILDING
FOR THE STORAGE OF HAY,
STRAW AND MACHINERY**

**(AGRICULTURAL/FORESTRY
DETERMINATION)**

MAIN ISSUES

Whether or not the proposal can be determined under a Part 6 Class A - Agricultural Development on Units of 5 Hectares or more Prior Notification application

DESCRIPTION OF SITE

The site lies within the open countryside between Bradnop to the north-west and Bottomhouses to the south-east and comprises part of a farm on the north-side of the A523. Within the site is part of two adjoining livestock buildings on the northern edge of the farm building complex and which also includes part of the yard to the east of the buildings. The group of farm buildings is surrounded by open fields and is accessed via a farm access road connected to the main road to the south. There is a second access which leaves the yard towards the east connected to a longer farm access road.

PROPOSAL

The applicants seek prior approval to erect an agricultural storage building for the purposes of storing hay and straw.

The proposed building would have a breadth of 24.4 metres, a length of 36.75 metres, a height to the eaves of 5.5 metres and an overall height of 8.2metres.

OFFICER COMMENTS

In order for a building to benefit from agricultural Prior Approval, there are several criteria that must be met. In this case, as the site is greater than 5 hectares in size, these criteria are set out in Part 6 Class A (a).

These are:-

- a) works for the erection, extension or alteration of a building; or
- b) any excavation or engineering operations, which are reasonably necessary for the purposes of agriculture within that unit.

Development is not permitted by Class A if—

- a) the development would be carried out on a separate parcel of land forming part of the unit which is less than 1 hectare in area;

The storage building sits within a parcel of land that is more than 1 hectare in area.

- b) it would consist of the erection or extension of any agricultural building on an established agricultural unit (as defined in paragraph X of Part 3 of this Schedule) where development under Class Q or S of Part 3 (changes of use) of this Schedule has been carried out within a period of 10 years ending with the date on which development under Class A(a) begins;

The land has not been subject to a Class Q development.

- c) it would consist of, or include, the erection, extension or alteration of a dwelling;

The proposal does not include the erection, extension or alteration of a dwelling.

- d) it would involve the provision of a building, structure or works not designed for agricultural purposes;

It does not involve the provision of a building, structure or works not designed for agricultural purposes.

- e) the ground area which would be covered by—

- (i) any works or structure (other than a fence) for accommodating livestock or any plant or machinery arising from engineering operations; or

The building is for storage and not for livestock

- (ii) any building erected or extended or altered by virtue of Class A, would exceed 465 square metres, calculated as described in paragraph D.1(2)(a) of this Part;

The ground area to be covered does not exceed 1000m². The footprint is 896.7m².

f) the height of any part of any building, structure or works within 3 kilometres of the perimeter of an aerodrome would exceed 3 metres;

The building is not to be located within 3 kilometres of the perimeter of an aerodrome.

g) the height of any part of any building, structure or works not within 3 kilometres of the perimeter of an aerodrome would exceed 12 metres;

No part of the building would exceed 12 metres in height (the highest point is 8.2 metres).

h) any part of the development would be within 25 metres of a metalled part of a trunk road or classified road;

It is not to be sited within 25 metres of a metalled part of a trunk road or classified road.

i) it would consist of, or include, the erection or construction of, or the carrying out of any works to, a building, structure or an excavation used or to be used for the accommodation of livestock or for the storage of slurry or sewage sludge where the building, structure or excavation is, or would be, within 400 metres of the curtilage of a protected building;

The building will not be used for the accommodation of livestock or storage of slurry or sewage sludge where the building, structure or excavation is, or would be, within 400 metres of the curtilage of a protected building.

j) it would involve excavations or engineering operations on or over article 2(4) land which are connected with fish farming; or

Not applicable

k) any building for storing fuel for or waste from a biomass boiler or an anaerobic digestion system—

The building will not be used for storing fuel for or waste from a biomass boiler or an anaerobic digestion system

(i) would be used for storing waste not produced by that boiler or system or for storing fuel not produced on land within the unit; or

The building will not be used for storing waste not produced by that boiler or system or for storing fuel not produced on land within the unit.

(ii) is or would be within 400 metres of the curtilage of a protected building.

The site is within 400 metres of the curtilage of protected buildings

In addition to the above, matters of siting, design and external appearance must also be considered. The location is at the edge of an established farming stead within the open countryside, meaning that any building erected may appear more prominent due to the dynamics of the site. However, it's proposed location is immediately adjacent to existing structures of comparable height and similar materials to the proposed building which will help to mitigate for any visually prominence. The proposed design is typical of modern agricultural buildings, and this includes the proposed materials. The proposed building would therefore be entirely in keeping with the agricultural character of the site and the building's intended purpose.

CONCLUSION / PLANNING BALANCE

The application meets all the required criteria under Part 6 Class A.

OFFICER RECOMMENDATION : Prior Approval is not required.
