Submission: Objection

Comments: Presently the traffic on Mill Street at peak times is incredibly slow and often at a stand still. An increase in standing traffic due to a drive-thru restaurant will lead to an increase in pollution (both emissions and noise) along with further difficulty for traffic moving through the town. There is also risk that traffic will be forced through rat runs going up belle vue road or daisy bank to get through the town, increasing the risk of road traffic accidents in residential area's.

In addition the planning documents state that there were no other sites suitable for this restaurant, yet there is significant brownfield land no more than 350m away.
