Submission: Objection

Comments: I have significant reservations and concerns regarding this application for 113 Mill street.

as safety officer for LTFC i have concerns regarding traffic egress and access to and from the club site via and past the proposed site. the traffic is all ready at a premium and is considerably increased during match days with the majority of spectators traveling to and from by car. let alone the spectators who walk from town down to the club will have to pass the site and have to negotiate increased traffic and potential delivery vehicles. a large proportion of these being elderly and potentially infirm or young children and parents having to negotiate a drive through on an already busy trunk road into and out of leek.

with the club having started a new community enterprise and working with and in the community a new takeaway will have significant impact on the club and how it is working and what it can provide to the local community and how it will be able to engage with the community supporting and nurturing.

along with the added litter and carbon footprint pollution of added cars in stationary idling is this how we want to sustain the environment and keep our town green by adding more traffic litter and exhaust gases.

further concern i have are that the drive through will be on top of a busy school crossing patrol and will increase the dangers and risk to those crossing during already busy times as cars will be not only travelling into and out of leek but also trying to turn into bell view, abbey green rd and hencroft to name a few as well as trying to negotiate a drive through.
