Submission: Objection

Comments: ¿ The development as it is currently designed would significantly hamper NGETs ability to access, maintain and repair these assets in the future.

¿ The developer has not consulted NGET on statutory safety electrical clearances

¿ NGET has not yet granted any access or easement rights to the developer for the cable easement required to connect their assets to the 132kV substation. Indeed at this time exactly where this connection will be able to take place and the associated extension works required to facilitate it have not been determined or agreed with NGET and will be subject to change.

This is a holding objection before NGET can consider this matter further. The developer should make enquiries via the Line Search Before You Dig system in order to get a response from the NGET asset protection scheme.
