The proposed extension by Advanced Proteins (Pointon;s) gives many Cheddleton residents a great unease, we still remember some of the few rare days of last summer when we could take full advantage of the warm weather, when at last you could open all the windows for some ¿fresh air¿ only to find that the famous ¿Pointon Stink¿ was there to greet you and if you were brave enough to try and sit in the garden it would not be for long.

This has been have replicated in these early months of 2022 when we have had to close even slightly open windows for the same reason.

The Pointon Stink comes not only from the factory for depending on the wind comes from the trucks that access the factory via the A520 and/or Bones Lane.

So, all of this is almost doubling in size with possibly double the trucks with what the Pointon Stink almost doubling with it?

This besides we like others are also concerned of the impact on the environment and the flora and fauna that this area holds.

Our own observations can account for over seventy species of bird which includes Barn Owl, Tawny Owl, Great Spotted Woodpecker, Peregrine, Merlin, Sparrowhawk, Red Kite, Siskin, Redpoll, Brambling, Bullfinch, Woodcock, Curlew and Lapwing just to name a few.

We have also observed Red Deer, Roe Deer, Fox, Hedgehogs and Pipistrelles.

The conclusion from Sterna Ecology that

¿The Proposed Development Site is considered to be of low ornithological value, both for breeding and

wintering birds. 4

Is the wrong conclusion and is based upon very limited and not strictly accurate information.

However, it will be of nil ornithological and wildlife value ever again if you destroy it by this development.
