Submission: Objection

Comments: Regarding the application to expand the site of Advanced Proteins at the site in Cheddleton. I feel despite all the assurances that the site will be concealed by newly planted foliage and pretty wild flower meadows it will not take away the fact a large factory will be taking over a large portion of Green Belt land when in the current climate we should be doing all we can to maintain as much greenery as possible, this is not forgetting that Cheddleton as mentioned is a rural area and should remain so. The traffic will no doubt increase on roads which are already in a poor state probably due in part to the large volume of heavy vehicles which run through the VILLAGES. The smell from the factory again appears to be increasing so would only get worse with an increase in capacity. As mentioned last time I objected the constant drizzle from the factory is a cause for some annoyance and a reluctance to open windows in the evening. Also the impact the light pollution has already is tremendous throughout the night and again I can only imagine this to get worse. I understand such factories need to be built however remember this is a village in a rural area and people have moved to the area to have a quiet lifestyle not to have a further huge factory built on their doorstep. We have put up with the smell from this atrocity for long enough please don't subject us to further disruption and ruin further countryside.
