Submission: Objection

Comments: Any extension to this facility will impact on the local residents. We already have significant noise and light pollution that impacts on our lives as we back onto the factory. The extension will potentially add additional noise, we are already aware of a persistent droning noise from the factory when it is running. At night we have lights visible to the back of woodland Avenue and if we have our windows open the noise from the factory, trucks and reversing alerts.

In addition the local infrastructure will struggle with additional HGV, the local highway is already under stress and in disrepair without heavy construction traffic and future additional HGV traffic. The impact on local wildlife also needs to be considered, the area is rich in bird and wildlife, additional building will disrupt this and potentially damage their habitat.
