Hello

The retrospective planning application Mr Lee Cooper, 2 Stonehouse Road has requested for his greenhouse.

The greenhouse in question has been erected so its side elevation runs parallel to the dividing fence of 4 Stonehouse Road. The gap between the greenhouse and the dividing fence is approximately 150mm leaving little or no room for the fence to be maintained.

The fence does not encroach on Mr Cooper's property.

Secondly, storm Franklyn blew out the glass panels of the greenhouse roof and was left scattered on the driveway and vehicles of No 4. Luckily for Mr Cooper no damage was caused to either the vehicles or the tyres. If planning is granted the current single glazed panels to all the roof and the side elevation facing the dividing fence should be replaced with a non shatterproof material. A realistic time scale for this alteration should be set and Mr Cooper should be requested to provide proof of receipt the alterations have been completed.

Thank you

Shona Harrison
