With regard to the above planning application for change of use to assembly and leisure we currently experience significant noise from the current business below us, 'Rooftop STUDIOS Performing arts'. Having read the planning application the applicant states that there is no noise impact and no plans to mitigate any noise impact under the new proposal but as it appears to be a music related venture our concern is that the noise will continue to impact us. There appears to be no sound proofing at all between the business below us and ourselves.

We don't want to prevent the application from proceeding however we do have concerns regarding the current noise impact and it being potentially worse moving forward. We have a high footfall of customers and the noise can be really distracting for both our staff and customers during our office hours 9am to 5pm.

Kind regards,

Nicola Briggs
